DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 16-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 16-20 direct to data stored on a medium. Since the data neither providing **functional** relationship to the medium nor imparting to any structural software and hardware component to perform certain functions processed by a computer, the data does not make it statutory. See MPEP 2100.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 16 and 25-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al (6,421,499).

Regarding claims 16 and 25-28 Kim discloses a recording/reproducing apparatus (Figs 1, 2,3, 4) for recording and reproducing contents data including at least one of movie data and still picture data, and to store control information including information for managing a sequence or a chain of the programs on a recording medium (column 2), the information including:

one or more fields with cell information (CI), the CI of each said field includes at least a movie cell information (M CI) or a still picture cell information (SCI)(column 2) ; the SCI includes a field with still picture cell general information (S C GI) and one or more fields with still picture cell entry point information (S C-EPI#); the S C GI includes a number of cell entry point information fields (C EPI Ns) that describing a number of S C EPI# in a cell (index number of and thumbnail), and wherein said contents data is configured to include one or more object streams (column 4, lines 37 to column 5 line 8). Further , Kim teaches reproducing of still video objects based on the control information (column 39, lines 40-47).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 2615

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 17- 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim in view of Heo (6,222,983).

Kim fails to specifically teaches additional control information for audio streams .

Heo teaches a medium which has been stored with control information for audio stream (Figs. 10-15).

It would have been obvious to one of ordinary skill in the art to modify Kim with the teaching of Heo by providing the medium of Kim with control information for audio streams as taught by Heo for additional use.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kim et al teaches recording/ reproducing apparatus for recording and reproducing still picture objects .
